

Moth Survey Results

Date: August 10, 2008
Location: Stinson Prairie
Number of trees baited: 0

Weather: 21:00, 63°, light+ E wind, mostly clear
23:00, 60°, light+ E wind, mostly cloudy

Circuits and Moths per Tree

20:15 – 20:26 N/A
21:36 – 21:43 N/A

Comments

1. Moon 2 days past quarter. Sunset 8:25 p.m.
2. Light on at 9:00. Lights off at 11:00
3. Used 15-watt UV fixture.

Captures and Time

1. Tiny brightly colored moth at UV light, env. AA– 21:04
2. Tiny boldly patterned moth at UV light, env. BB– 21:07
3. Medium-small moth at UV light, env. CC– 21:14
4. Small to smallish moth at UV light, env. DD– 21:16
5. Small dark moth at UV light, env. EE– 21:22
6. Smallish dark moth at UV light, env. FF– 21:33
7. Smallish moth at UV light, env. GG– 21:53
8. Tiny bird-dropping moth at UV light, env. HH– 21:59
9. Medium-small moth at UV light, env. II– 22:04
10. Smallish to medium-small moth at UV light, env. JJ– 22:11
11. Small colorful moth at UV light, env. KK– 22:13
12. Smallish moth at UV light, env. LL– 22:16
13. Smallish moth at UV light, env. MM– 22:17
14. Smallish to medium-small moth at UV light, env. NN– 22:20
15. Smallish moth at UV light, env. OO– 22:37
16. Medium-small moth at UV light, env. PP– 22:40
17. Small colorful moth at UV light, env. QQ– 22:48
18. Smallish moth at UV light, env. RR– 22:53

Set up at gazebo. No mosquitoes. Very few moths on the sheet at any given time – probably a maximum of 3-4. Very few beetles. A white-lined sphinx moth came to the sheet at 22:06.
